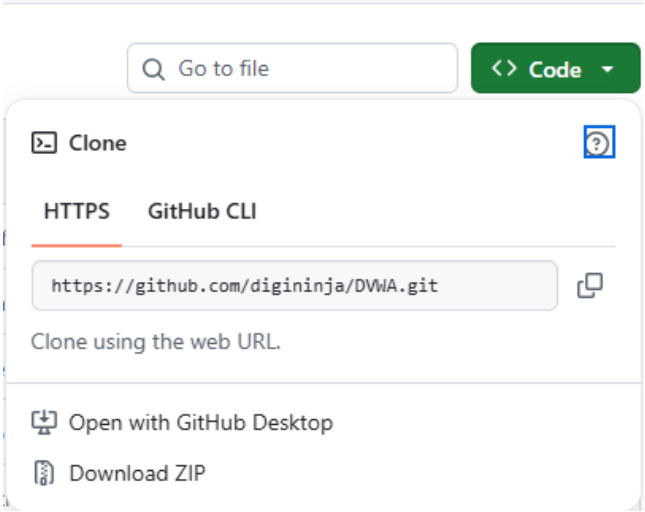
Practical No. 8

Steps I : Download XAMPP

Step II: https://github.com/digininja/DVWA and download the zip file



Step III: Extract The Downloaded DVWA zip file and if the folder name is DVWA-master than rename to DVWA

C:\xampp\htdocs\DVWA\DVWA-master\config

Step IV: Open the file config.inc.php and update db_server as 127.0.0.1-

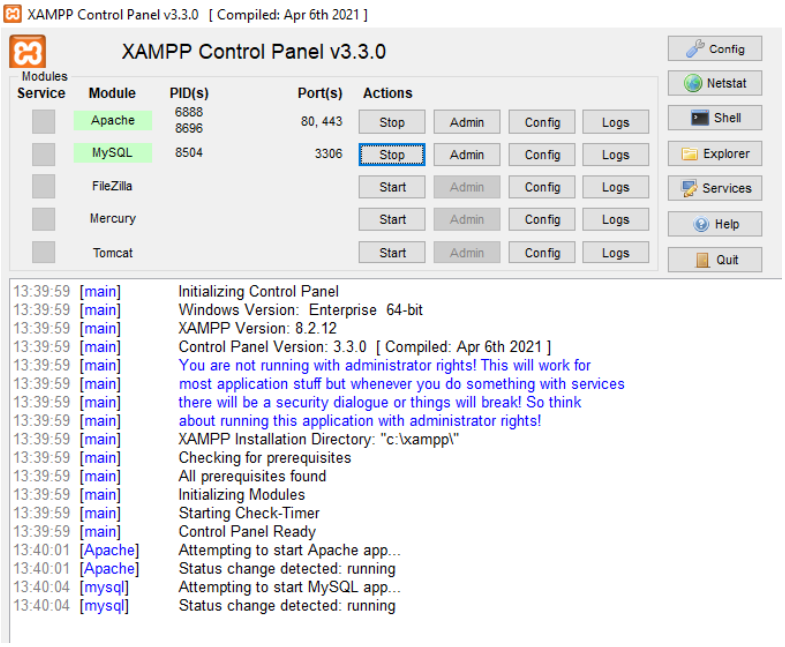
db_user='root' and dbpassword-' '

```
# If you are using MariaDB then you cannot use root, you must use cre
#   See README.md for more information on this.
$_DVWA = array();
$_DVWA[ 'db_server' ]   = getenv('DB_SERVER') ?: '127.0.0.1';
$_DVWA[ 'db_database' ] = getenv('DB_DATABASE') ?: 'dvwa';
$_DVWA[ 'db_user' ]     = getenv('DB_USER') ?: 'root';
$_DVWA[ 'db_password' ] = getenv('DB_PASSWORD') ?: '';
$_DVWA[ 'db_port']      = getenv('DB_PORT') ?: '3306';
```

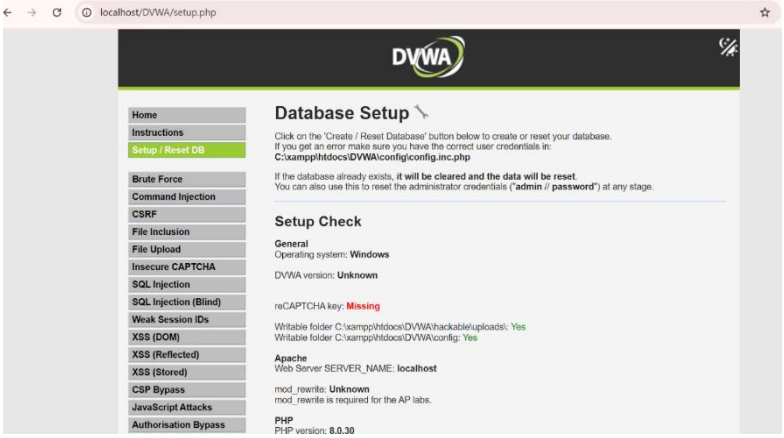
```
#   Please use a database dedicated to DVWA.
#
# If you are using MariaDB then you cannot use root, you must use create a dedicated DVWA user.
#   See README.md for more information on this.
$_DVWA = array();
$_DVWA[ 'db_server' ]   = getenv('DB_SERVER') ?: '127.0.0.1-db_user ='root'' and dbpassword-'';
$_DVWA[ 'db_database' ] = getenv('DB_DATABASE') ?: 'dvwa';
$_DVWA[ 'db_user' ]     = getenv('DB_USER') ?: 'root';
$_DVWA[ 'db_password' ] = getenv('DB_PASSWORD') ?:'';
$_DVWA[ 'db_port']      = getenv('DB_PORT') ?: '3306';
```

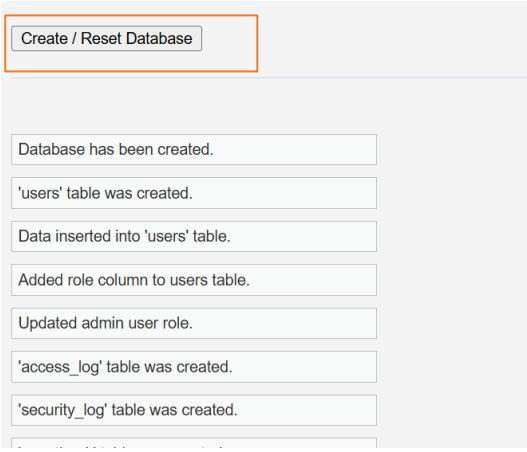
Step V: Goto start button.Type XAMPP Control panel. Click open. Now start Apache and Mysql.

Practical No. 8



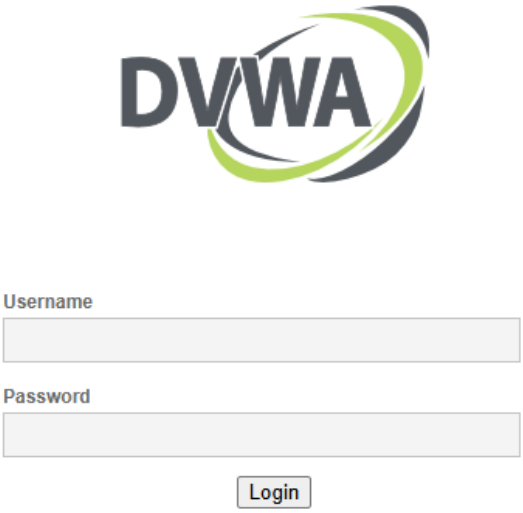
Step VI: Go to http://localhost/DVWA/setup.php. And Click create/reset database





Step VII: http://localhost/dvwa/login.php

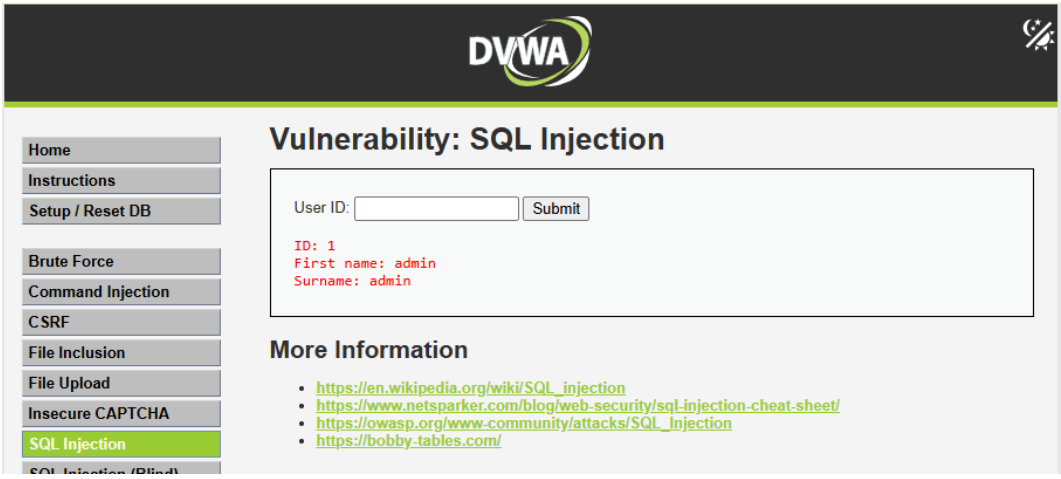
Username: admin and Password=password



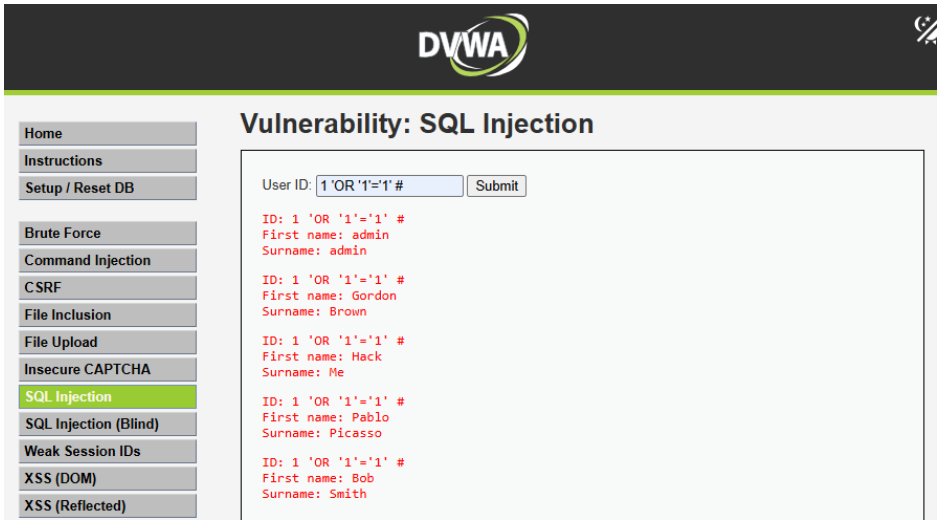
Step VIII: Click on DVWA security and keep the security level to low.

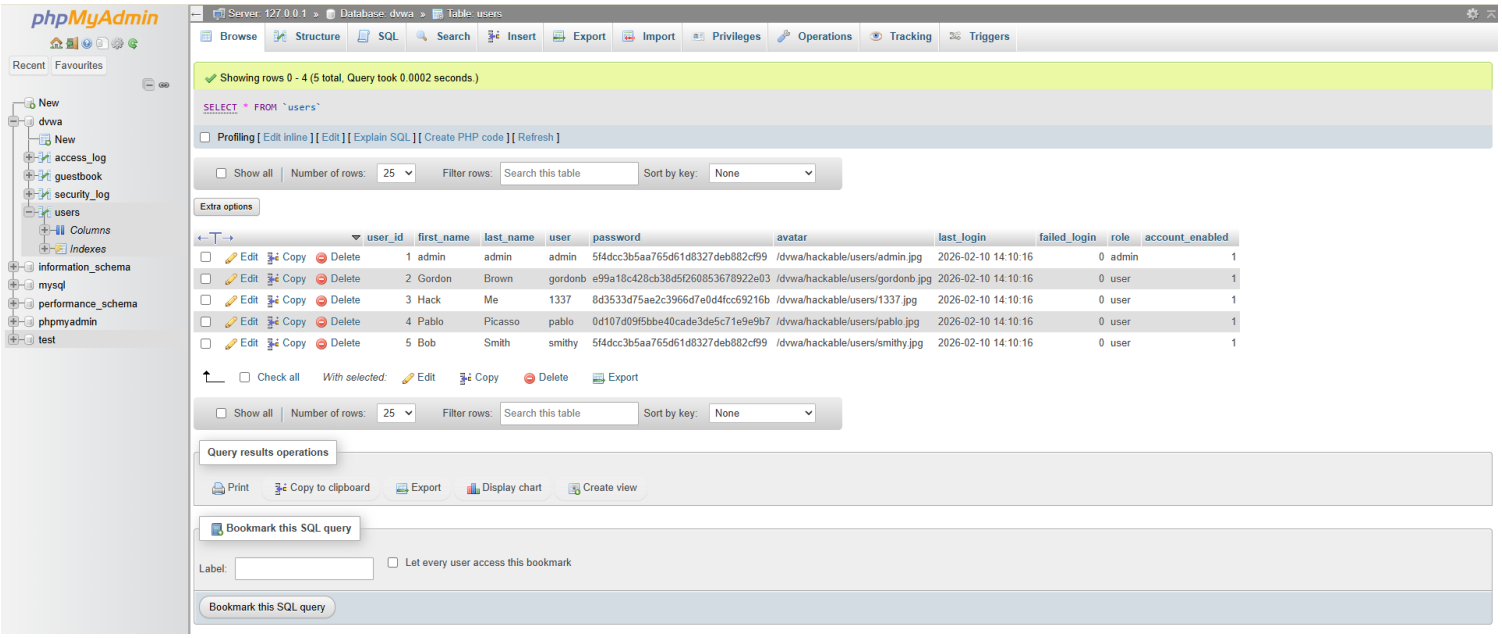
Click on sql injection -> write user as 1 and submit

Practical No. 8



Again Type Another Queries : **1 'OR '1'='1' #**





Step IX :Go to http://localhost/phpmyadmin -> click on dvwa -> user
